Suspension and masking technology
for the surface finishing industry

A close-up, slightly blurred photograph of a man with a beard and mustache, wearing a dark suit jacket over a white shirt. He is looking off to the side with a thoughtful expression. In the background, a large industrial machine with various mechanical components and a prominent yellow sign is visible.

Together

We have no doubt that our customers have full control of how they achieve maximum flow efficiency. Our task is to provide them with the means to achieve that level optimally. At Epifatech we recognise and appreciate the expertise and experience of our customers. Our aim is to use our knowledge and capability to help them progress. It has never been a question of delivering a mass-produced product. What we are seeking is a partnership with our customers to achieve a specially adapted solution.

Cooperation begins at an early stage where we examine the customer's production process. How many parts need to be finished at the same time? How much space is available? How can the suspension systems be transported and stored?

The preliminary study is a crucial part of the project as we acquire an understanding of the needs of the customer. This then gives us a basis for presenting a design that is best suited to each assignment. That is how we and our customers work together to achieve common goals.

ideas

When developing a new suspension system, the starting point is determining how many parts will need to be placed on each frame and how it will affect the finishing technique.

We have experience of suspension systems that work in different ways depending on the finishing technique. A part could be electroplated to achieve overall protection against corrosion. The same part could then move on to be powder coated – but only certain sections. The other sections need to be masked. In the past, each part was masked manually before coating, which proved extremely time-consuming. A manual system was also less precise. With a solution from Epifatech, the same design can be used for both complete electroplating and partial powder coating. This not only means that a great deal of extra masking can be avoided, it also eliminates the need to transfer parts to a new frame when moving on to the next finishing stage.

By thinking innovatively we identify new approaches and deliver solutions that function down to the part level. Solutions that will last a long time and which, with the application of logistics thinking, are adapted to the customer's production system and their specific requirements. Optimised on every level.

The background image is an aerial photograph of a dense forest during autumn. The trees are a mix of vibrant yellow, orange, and green, indicating a transition between seasons. A paved road or path cuts through the forest, winding its way through the trees. The lighting suggests either sunrise or sunset, casting a warm glow over the scene.

come to life

Surface finishing can differ quite significantly – and on many levels. Quality stipulations presented by our customers are becoming increasingly stringent. This makes stricter demands on the finishing and the suspension system. We ensure that we see the totality in each project and we allow the end-product to govern the way we work.

Our suspension systems help make the process as smooth and optimised as possible from start to finish. A slightly more advanced suspension system could also make it easier to synchronise the different phases. By doing so, our customers have better control over the entire process through to the finished product at the end-customer.

We maintain that the process and end-result are equally important and to underpin this principle we provide a complete concept where the outcome is based clearly on pre-set objectives.

optimised

Optimising production is an obvious ambition when it comes to suspension systems for surface finishing. At Epifatech optimisation involves seeing the totality and resolving problems becomes an integral part of our work process. It is all about saving time by having systems that are carefully adapted to the part that is to be suspended. But it is also a question of flexibility and eliminating unnecessary handling. If, for example, suspension systems are used at different stages, it could be important to store the systems optimally to save on space. It could also be a question of developing an efficient process for sending away systems to have paint burnt off. With several systems hanging on the same frame, they can be easily burnt together in a considerably shorter period of time than if they were handled individually.

By focusing on the process as a whole and not just the actual suspension arrangement, we can provide added value for the customer, which in the final analysis saves time and offers long-term sustainability.

ELFASTECH
makes surface to ...

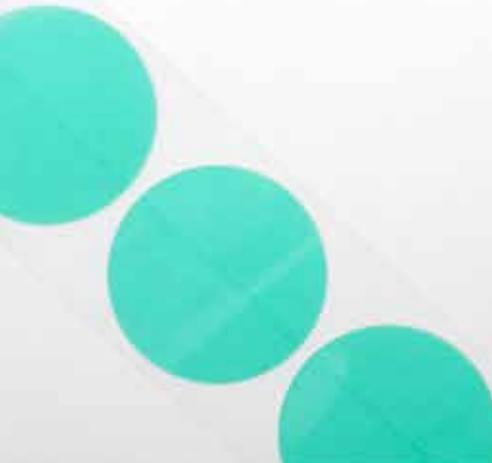

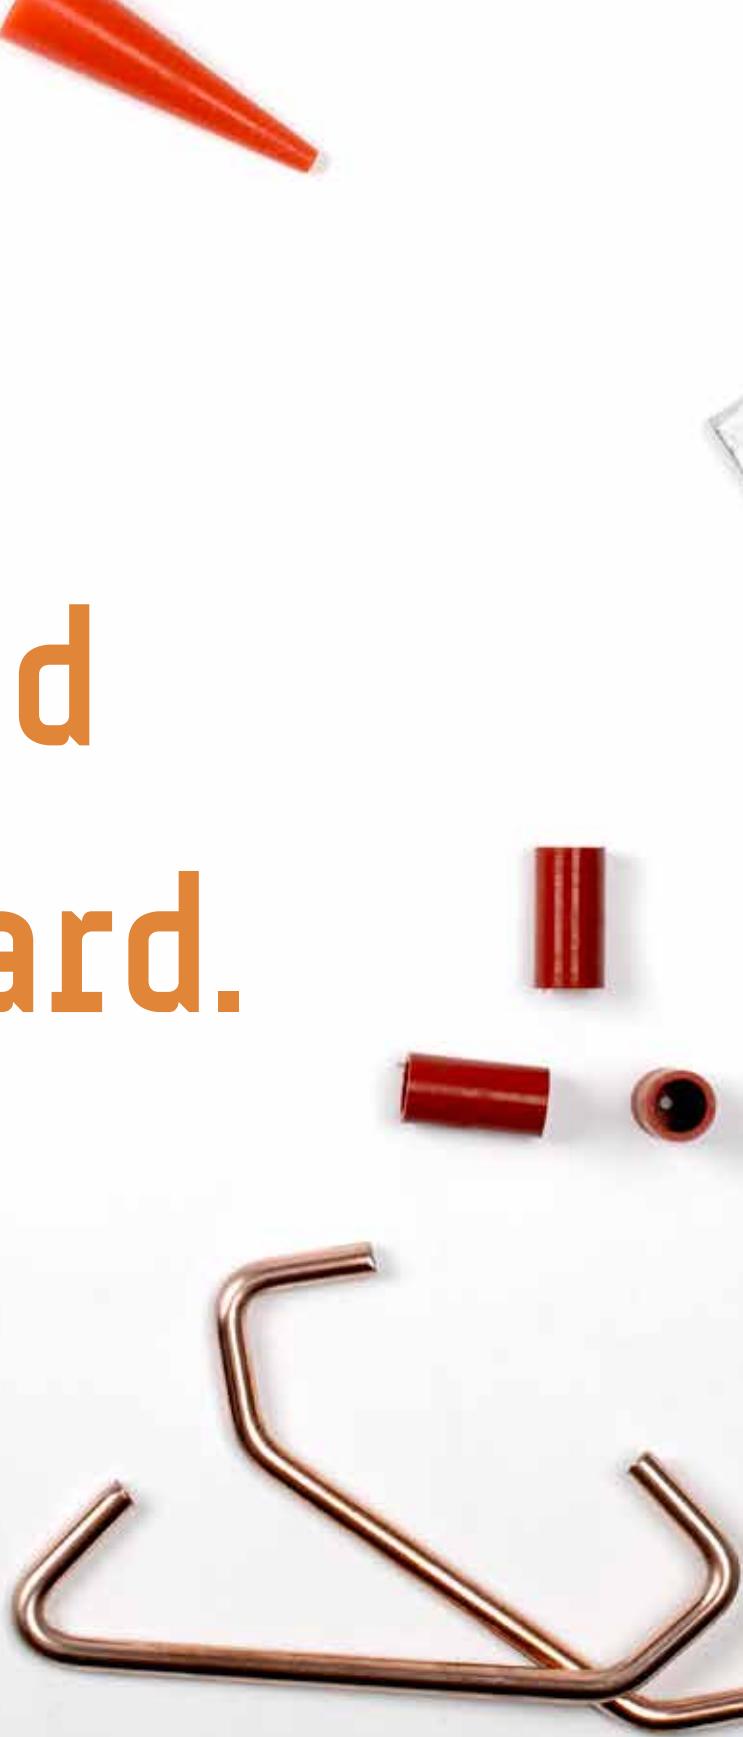

and quality driven.

We believe in a quality-driven work process. With our highly stable suspension systems, all the components are fixed, allowing full control of the dimensions and distance between the parts. When suspended, the parts hang in the same way every time. Not only does this simplify the process, it is a vital requirement when a system is robotised.

Quality is also a matter of gaining the trust of the customer. Ensuring that our solutions can be adapted to all types of projects and operations is a priority. To achieve this, we have not locked ourselves into a standard range. Instead we strive in every way to be flexible and by doing so deliver products based on needs. The result is that we can offer complete, optimised solutions without them necessarily costing more.

By immersing ourselves in our customer's production process, logistics and storage systems we build up a solid partnership with a level of quality that is consistently high throughout the whole process.

With us
optimised
is standard.

SHAPING COLLABORATION

At Epifatech we develop and manufacture suspension systems for electroplating and powder coating. We also offer a wide range of masking options. We have been operating for more than 40 years and we have more experience in the industry than the majority of our competitors.

In cooperation with our customers we have produced effective solutions in a range of areas and we are now represented throughout the whole of Europe.

We have a wide assortment of hooks, fittings, masking equipment, plugs and other products

although our main strength lies in our flexibility. Working closely with our customers, we constantly seek to find specially adapted solutions. We usually say that we have optimised solutions as standard. By this we mean that it should not need to cost more to have an adapted system than it would to buy ready-made standard solutions.

Not only are we committed, we are also competitive. This is enhanced by the open cooperation we strive for with our customers. We have worked with the majority of our customers for a long time, which is a clear sign of our mutual success.

It's your profit!

We're constantly working on solutions to optimise your entire surface finishing process long-term. Short and sweet. You earn more money.

Together, we oversee the entire process flow, including logistics which are also important when it comes to saving time.

#1

DEVELOPMENT ON-DEMAND

Knowledge, holistic solutions and a drive to always be moving forwards make Bogelack one of the market's most respected surface finishing suppliers. With mutual trust and outstanding engagement, Epifatech has been a contributing factor in making Bogelack's production both more systematic and more effective.

#2

PATENTED SOLUTIONS

We at Epifatech have come up with a patented solution for using products which require powder coating and ED coating simultaneously.

Read more on pages 16–17

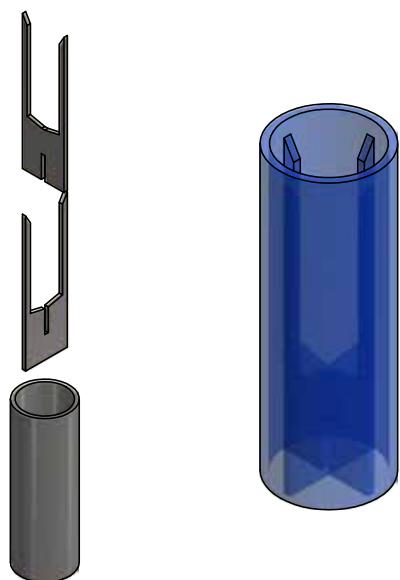

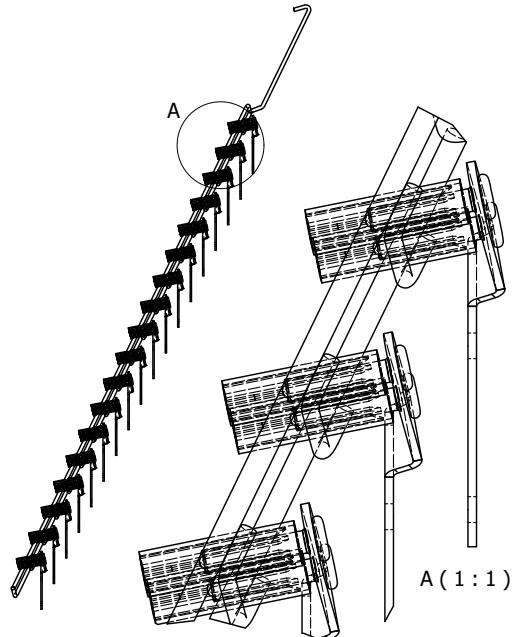

Patented solutions:

HOLDER FOR SURFACE FINISHING SYSTEM

If you're a manufacturer of various types of metal products, it's sometimes important that you apply surface finishing to your products. One of the reasons we apply surface finishing to items is to make them more resistant to corrosion and less susceptible to external influences. Another reason is to get a neat and tidy finished product that looks great.

After lengthy testing and countless reviews, we at Epifatech have come up with a patented solution for using products which require powder coating and ED coating simultaneously. Since this process requires a solution for suspension and masking in parallel, we have created a system for different sizes of axles which not only saves time by simplifying logistics, but also saves on extra masking costs.

Development on-demand: Bogelack

Having used Epifatech as his supplier for more than 30 years, CEO and Chief of Marketing at Bogelack in Ulricehamn, Roger Wallentin, is one very happy customer.

Knowledge, holistic solutions and a drive to always be moving forwards make Bogelack one of the market's most respected surface finishing suppliers. With mutual trust and outstanding engagement, Epifatech has been a contributing factor in making Bogelack's production both more systematic and more effective.

"Epifatech is a supplier that listens to you and by bringing ideas to life they have helped to make our process more effective," explains Roger.

Some projects are more complicated than others. Epifatech is an approachable and flexible supplier that engages personally to find smart solutions on all sorts of projects.

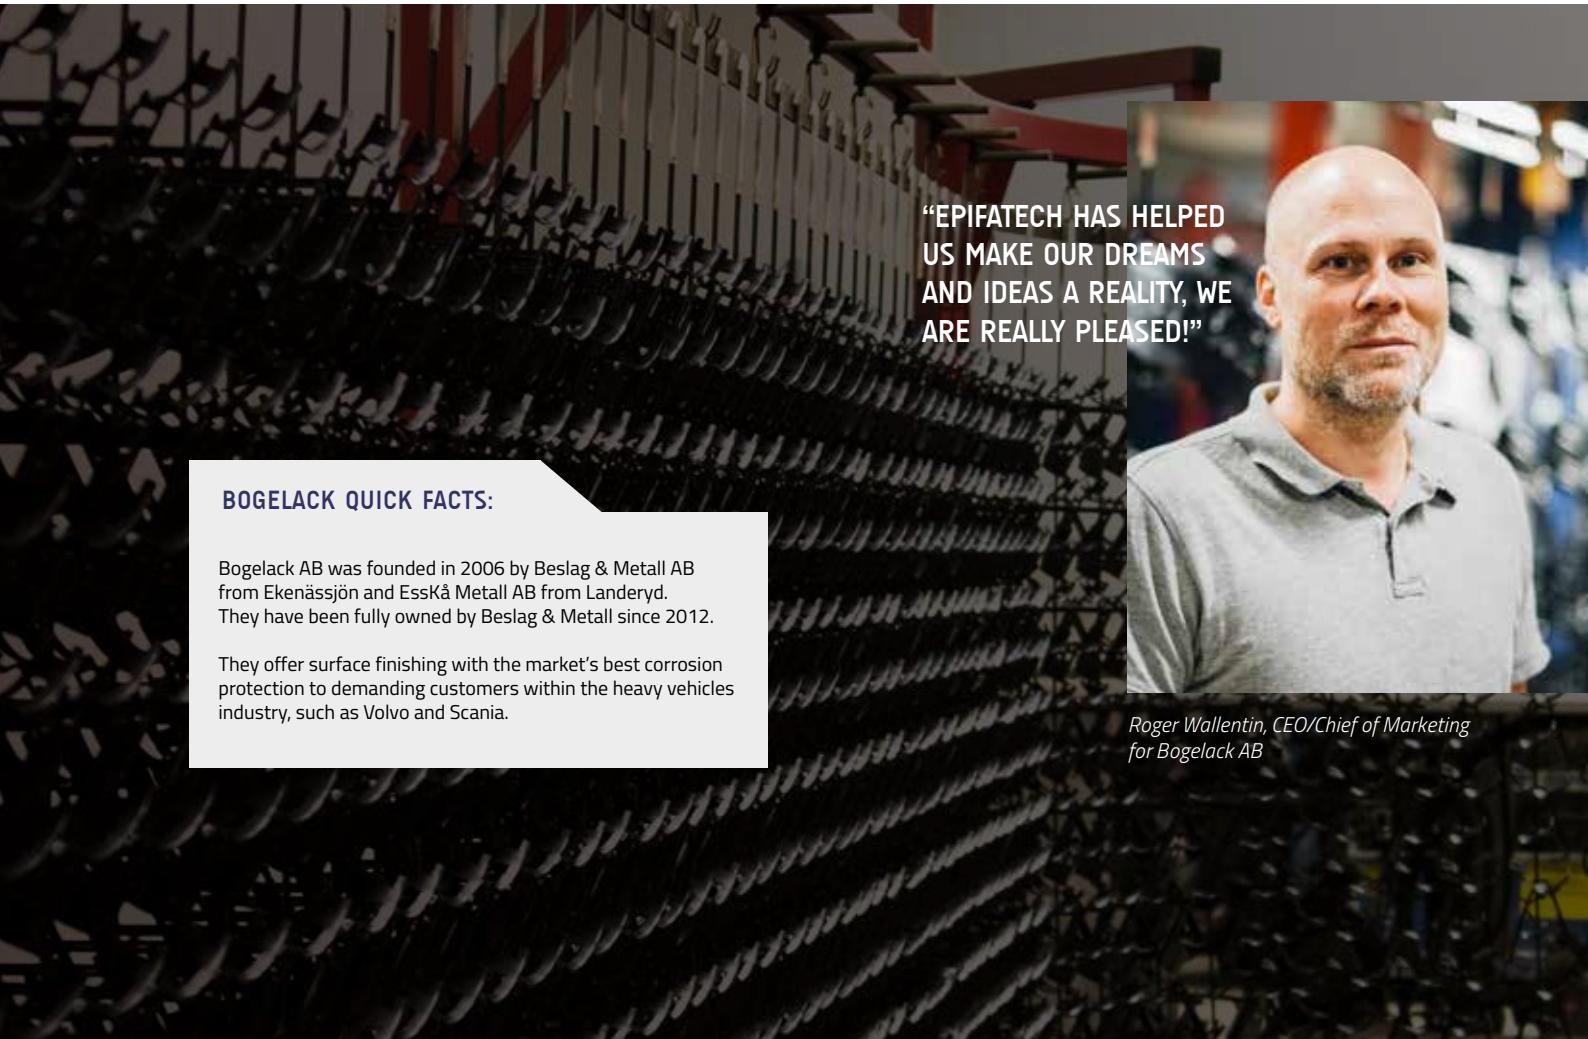

THE PROCESS: STEP-BY-STEP

1

The process begins when the customer gets a product that needs the best possible functional suspension. Some parts might also need to be protected using surface finishing. Being able to produce the best possible suspension comes from the demand for the desired result.

2

The customer gets in touch with Epifatech and tells us what they want and what they need from a solution. Together, Epifatech and the customer discuss potential solutions, taking into account various aspects such as logistics, ergonomics and operation.

BOGELACK QUICK FACTS:

Bogelack AB was founded in 2006 by Beslag & Metall AB from Ekenässjön and EssKå Metall AB from Landeryd. They have been fully owned by Beslag & Metall since 2012.

They offer surface finishing with the market's best corrosion protection to demanding customers within the heavy vehicles industry, such as Volvo and Scania.

"EPIFATECH HAS HELPED US MAKE OUR DREAMS AND IDEAS A REALITY, WE ARE REALLY PLEASED!"

Roger Wallentin, CEO/Chief of Marketing
for Bogelack AB

3

Epifatech prepares a basic illustration which we review with the customer to come up with any adjustments such as changes to dimensions, the suspension function and possibly masking. Picking out and removing parts and storage trolleys is also an important aspect that is reviewed in order to assist with logistics.

4

After customer approval, Epifatech produces a prototype solution for testing before series production can begin. In order to get a bigger set of more reliable results, the prototype comes in whatever quantity the individual customer wants.

On hand wherever you are in Europe:

At Epifatech, we value our customers and the open cooperation that forms the basis of long-term, mutual relationships. Together with our customers, we find new ways of creating ideal solutions adapted to customers' wants and needs.

We currently have presence across Europe with strategic locations that increase availability and make us more flexible and more effective. This also strengthens our customer service as we can deliver products to our customers faster and

more sustainably. Distribution centres across Europe create better availability with closer connections and even closer proximity to our customers. Increasing distribution is important when it comes to facilitating the process, for both us and the customer. This makes us flexible by giving us the ability to deliver our specialised solutions to our customer faster if required – excellent availability is one of our top priorities in our day-to-day operations.

STRUT 4

Strut for the simplified suspension system with a centred strut and double hook for suspension on both sides.

SLEEVE SUSPENSION

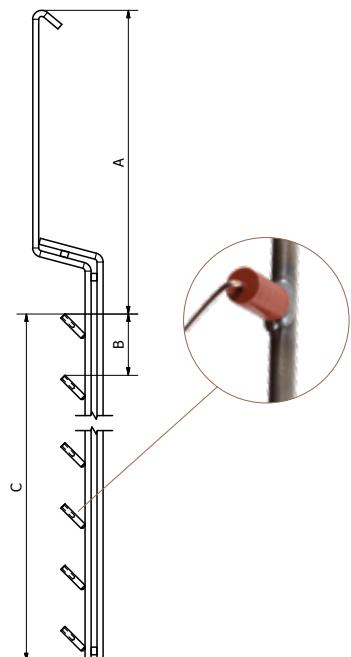

A smaller version of the suspension system where the hooks are held in the rubber bracket itself. Hooks are easy to change and make the system very versatile.

SILICONE SLEEVE FOR STEEL TUBE

In addition to the suspension strut, steel sleeve masking can be used for suspension systems (page 26) and struts (page 29). The sleeve has a flat top to prevent air from entering and to avoid fluid accumulation.

FIXED SYSTEM JIG

Cost-effective suspension

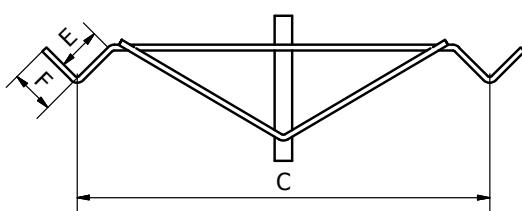

A robust design and construction that ensure suspension marks are kept to a minimum. Adapted to allow variation in spacing between levels. The total length can be adapted as necessary. As the structure is made from thin wire, powder coating is kept to a minimum, resulting in less powder waste.

PALLET COLLAR HOOK

The pallet collar hook is available for different numbers of collars that hold the collars in place.

Art.No.	For No. of pallet collars	Dia
PKK-1	1	4,0
PKK-2	2	4,0
PKK-3	3	4,0

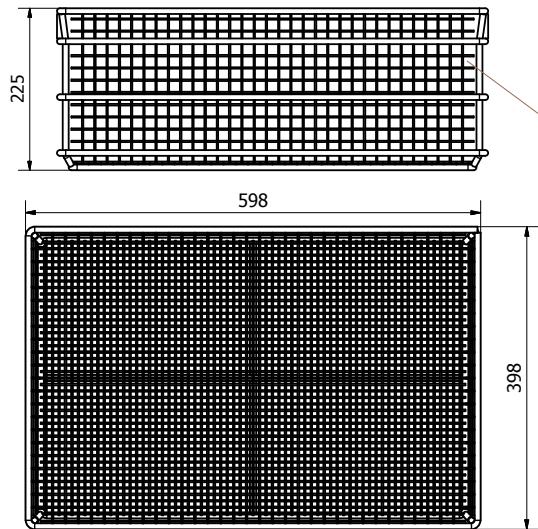

STORAGE SYSTEMS

Storage carts are manufactured according to the specific needs and wishes of the customer. We always use standard dimensions for EUR-pallets as a basis, making the carts easy to store and transport.

STAINLESS STEEL WASHING BASKET

Stainless steel acid-resistant washing basket. For rinsing products. Also available to size. Mesh opening 15 mm with 2.0 mm acid-resistant thread.

PERSONAL SERVICE FROM EPIFATECH

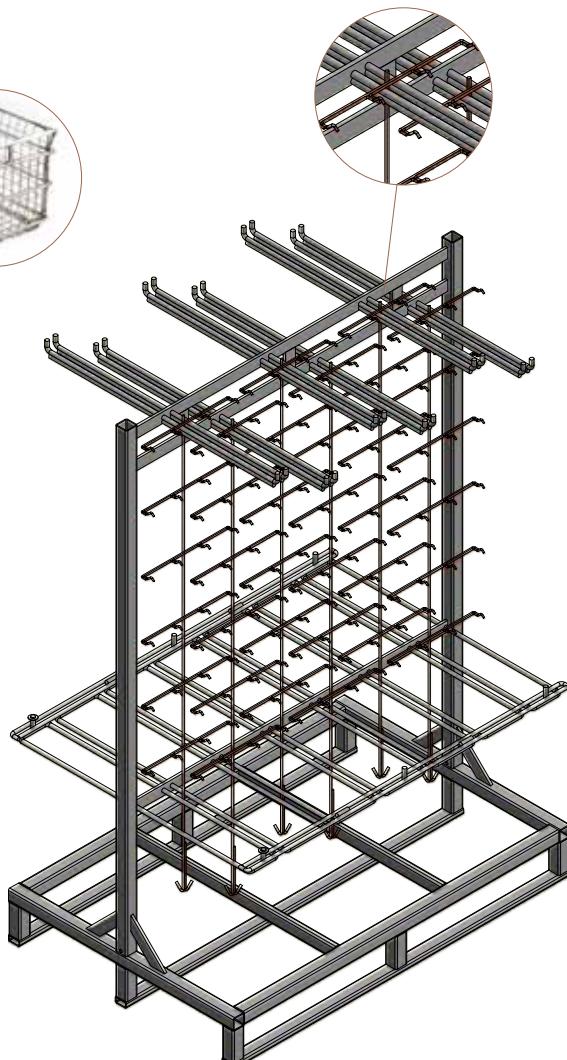

At Epifatech we adapt each product to suit specific customer requirements. With a personal contact and ongoing cooperation, we create optimised solutions that cover the entire production process.

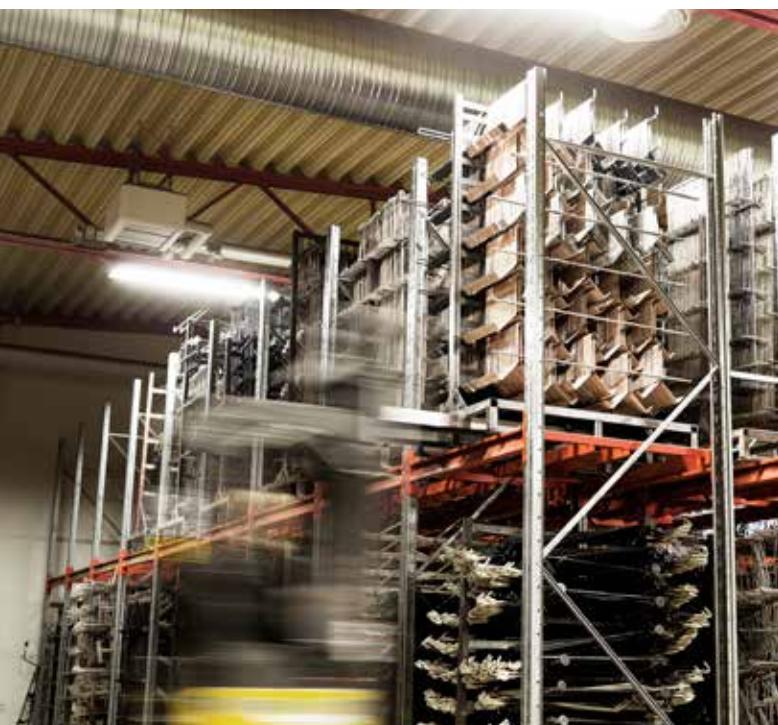

*Call us and we'll tell you more about how we work!
Phone +46 371-51 16 85 | info@epifatech.se*

These trolleys have been adapted for burning fixtures, which makes everything easier and saves time normally spent picking out fixtures.

STORAGE TROLLEY

Height and drawer adapted to match appearance on hangers.

Rationalised production with an optimised storage system from Epifatech.

Can hold
up to
1 tonne

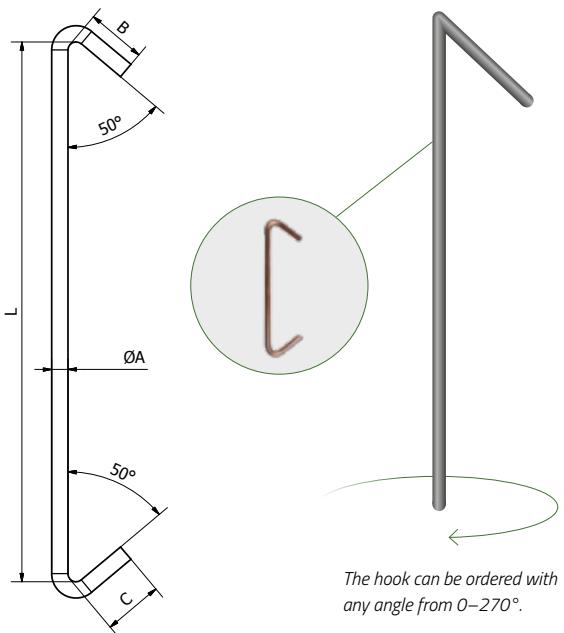

A close-up photograph of a person's hand wearing a white, textured glove. The hand is gripping a bundle of approximately ten silver-colored metal hooks. These hooks have a simple, curved hook shape at one end and a flat, rectangular base at the other. They are held in a loose fist-like grip.

Hooks

50-79

Hook 1	52
Hook 2	55
Hook 3	58
Hook 4	62
Hook 5	68
Hook 6	74
Hook with short leg	76
Suspension hook	77
Clamp hook	78
Vertical hook	78
Pipe hook	78
Top pipe hook	79
Angled hook	79
Double hook for pipe strut	79

**HOOK 1 | 0-270°**

Apart from the standard version, the hooks are also available with a specified angle. All at no extra cost. We also accept orders for other end versions with, for example, radii, zero angles etc. The final digit in the article number indicates the length of the hook (50-1200 mm).

Art. No. 1 - A - XXXX - XXX

Type of hook
Wire dimension
Hook length
Angle

We think ergonomically. That is why our boxes are always optimised to weigh no more than 20 kg.

*The number of hooks applies to angles 0° and 180°. Contact us for information about the number of hooks/box for other angles.

* Hooks with dimensions
ø 1,2-3,0mm are also available
with C dimensions = 11 or 20mm.

We think ergonomically. That is why our boxes are always optimised to weigh no more than 20 kg.

*The number of hooks applies to angles 0° and 180°. Contact us for information about the number of hooks/box for other angles.

HOOK 4 | 0-270°

Apart from the standard version, the hooks are also available with a specified angle. All at no extra cost. We also accept orders for other end versions with, for example, radii, zero angles etc. The final digit in the article number indicates the length of the hook (50-1200 mm).

Art. No. 4 - A - XXXX - XXX

Type of hook
Wire dimension
Hook length
Angle

*Hooks with dimensions
Ø 1.2-3.0 mm are also available with
a radius = 6, 11 or 12 mm. and D
dimensions = 10 or 18 mm.

We think ergonomically. That is why our boxes are always optimised to weigh no more than 20 kg.

*The number of hooks applies to angles 0° and 180°. Contact us for information about the number of hooks/box for other angles.

HOOK 5 | 0-270°

Apart from the standard version, the hooks are also available with a specified angle. All at no extra cost. We also accept orders for other end versions with, for example, radii, zero angles etc. The final digit in the article number indicates the length of the hook (50-1200 mm).

Art. No. 5 - A - XXXX - XXX

↓ ↓ ↓
 Type of hook Wire dimension Hook length Angle

*Hooks with dimensions
ø 1.2–3.0 mm are also available
with a radius = 11 or 12 mm.

We think ergonomically. That is why our boxes are always optimised to weigh no more than 20 kg.

*The number of hooks applies to angles 0° and 180°. Contact us for information about the number of hooks/box for other angles.

HOOK 6 | 0-270°

Apart from the standard version, the hooks are also available with a specified angle. All at no extra cost. We also accept orders for other end versions with, for example, radii, zero angles etc. The final digit in the article number indicates the length of the hook (50-1200 mm).

 Angle

We think ergonomically. That is why our boxes are always optimised to weigh no more than 20 kg.

*The number of hooks applies to angles 0° and 180°. Contact us for information about the number of hooks/box for other angles.

CASE: HYDRO

Mikael Loberg, CTO,
Hydro Extrusion Sweden AB

“BUILDING FIXTURES IS ONE THING BUT SUSPENDING THEM IS ENTIRELY DIFFERENT”

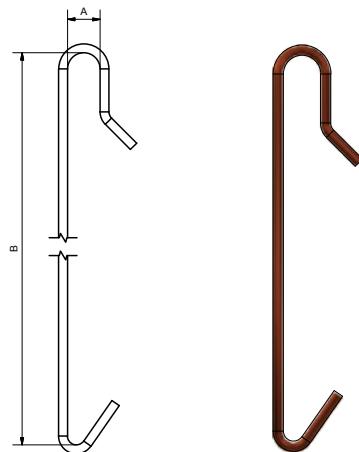

It used to be a case of just pushing on but these days Hydro knows it's all about optimisation. Together with Epifatech, old ideas are being revitalised for new generations in order to find customer-specific solutions. Ideas come about through teamwork and constant calculations create optimised hooks to keep on improving.

CLAMP HOOK

Stable suspension with clamp function and heavy suspension area thanks to thick thread.

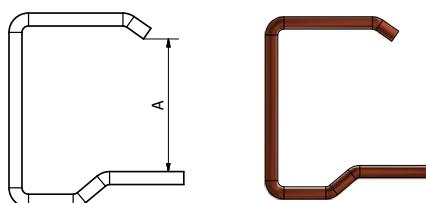

Art.No.	A mm	B mm	C mm	D mm	Pcs/box
KLK-1	30	4,5	11	11	10000

SPONGE PAD

Used as buffer for protecting surface-finished product against damage during delivery. Also available in other sizes.

SILICONE PRODUCTS

Here you will find our different silicone profiles. The silicone profiles are sold by the metre.

1. Silicone strip

Used for edge masking of metal constructions.

2. Silicone profile

Rectangular silicone profile. Customised..

3. Silicone foam

For masking of e.g. gaps between metal plates. Square or round.

4. Silicone bar

A solid bar, supplied in 25 m rolls. Available in diameters of 2–20 mm. Square version also available.

5. Silicone mat

Can be used for e.g. protection between two parts to avoid adhesion. Can also be used in the production of different profiles in smaller quantities. The mat is available in thicknesses of 1–8 mm.

Art.No.	Thickness mm
Silmat 1.0	1,0
Silmat 1.5	1,5
Silmat 2.0	2,0
Silmat 3.0	3,0
Silmat 4.0	4,0
Silmat 5.0	5,0
Silmat 6.0	6,0
Silmat 8.0	8,0

6. Magnetic mat

Heat-resistant magnetic mat available to size.

Art.No.	Thickness mm
MAGNM1	1,0mm
MAGNM2	2,0mm
MAGNM3	3,0mm
MAGNM4	4,0mm
MAGNM5	5,0mm
MAGNM6	6,0mm

A black and white photograph of a roll of masking tape. The tape has a distinctively textured, pebbled-grain pattern on its adhesive side, which is exposed as the roll is unrolled. The roll is positioned diagonally across the frame, with the core at the bottom left and the end of the tape extending towards the top right.

Masking tape

TAPE

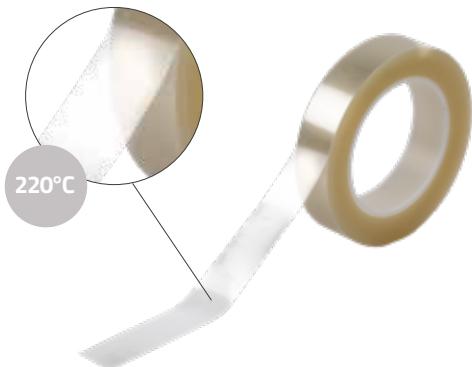

Our tapes are available in different colours and designs. The tape rolls are cut according to your wishes in widths of 3–1000 mm.

TAPE GREEN 210

Can be used at temperatures up to 220°C for approximately 25 minutes. Used in pre-preparation and for other purposes. Retains its function when cooled or heated. Also available with transparent adhesive.

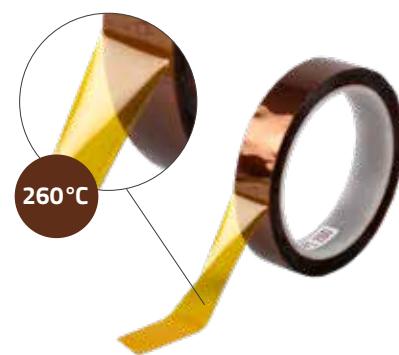

Thickness **0,089 mm**
Breaking point **60%**

TAPE WHITE 200

Can be used at temperatures up to 220°C for approximately 25 minutes. Used in pre-preparation and for other purposes. Retains its function when cooled or heated. Also available with green adhesive.

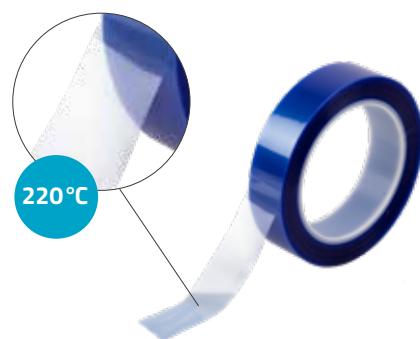

Thickness **0,089 mm**
Breaking point **60%**

TAPE BROWN 260

Tape 260 can withstand temperatures up to 260°C for short periods of time, and down to -80°C. It is resistant to a number of solutions and pre-treatment chemicals.

Thickness **0,065 mm**
Breaking point **50%**

TAPE BLUE 180

Same features as tape 210 green but more flexible, making it easier to mask irregular or uneven areas such as edges.

Thickness **0,068 mm**

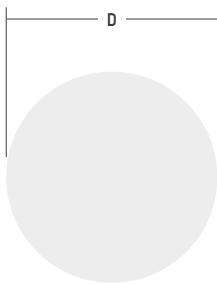

Our tape can also be specially cut for masking specific shapes and areas.

A slit backing strip makes it easier to remove the tape discs.

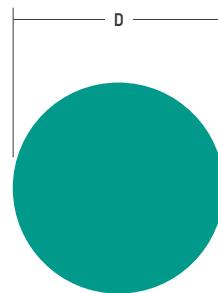

Using our own printer, we can make sure we get exact figures according to customer wishes for the quickest delivery and best result.

**TAPE DISCS WHITE 210°C**

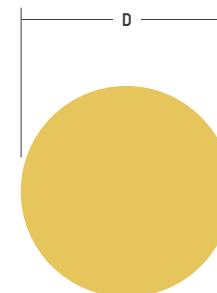

These transparent tape discs can also be ordered in specific sizes. The discs are also available with a slit backing strip for easy removal.

**SILVER ALUMINIUM TAPE**

Our aluminium tape can be used for masking during galvanising. Adhesive is resistant to high temperatures and can be used in temperatures up to 160°C.

Art.No.	Width mm	Maximum temp. °C	Metres/roll
ALT	6-500	160	50

**PACK TAPE**

Pack tape for cardboard boxes and envelopes. Highly adhesive, plus quiet and easy to roll.

Art.No.	Width mm	Metres/roll
PT30	30	66
PT50	50	66

**FIBREGLASS TAPE WHITE**

Fibreglass tape can withstand temperatures up to 260°C and is extremely pliable, making it easy to apply around edges. Can be used in conjunction with e.g. powder painting and blasting.

Art.No.	Width mm	Maximum temp. °C	Metres/roll
GCL	5-500	260	33

**CREPE TAPE**

Crepe tape is often used in conjunction with wet painting. Available in two versions – one that can withstand temperatures up to 60°C and another that can withstand temperatures up to 200°C. The thinness of the paper makes it easy to remove after finishing has been completed.

Art.No.	Width mm	Maximum temp. °C	Metres/roll
CRT60	5-500	60	33
CRT200	5-500	200	33

**BLAST TAPE WHITE**

Blast tape is a special tape that has been developed to offer strong protection in conjunction with sand blasting and shot blasting.

Art.No.	Width mm	Maximum temp. °C	Metres/roll
BLT	5-500	100	33

**VINYL TAPE**

Vinyl tape is resistant to acid, sun, water etc. It adheres particularly well to metal and plastic and is easy to apply due to its pliability.

Art.No.	Width mm	Maximum temp. °C	Metres/roll
VNT12,7x33	12,7	300	33
VNT19,1x33	19,1	300	33
VNT25,4x33	25,4	300	33
VNT38,1x33	38,1	300	33
VNT50,8x33	50,8	300	33

**SELF-VULCANISING SILICONE TAPE**

This tape is extremely flexible and is particular suitable for uneven surfaces. On application, the tape stretches around the product and is applied overlapping, ensuring very compact masking. Can withstand temperatures up to 300°C.

Art.No.	Width mm	Maximum temp. °C	Metres/roll
SSFT	25	300	11
SSFT	38	300	11
SSFT	50	300	11

**TAPE WITH ADHESIVE-FREE CENTRE SECTION**

Used, for example, for long products. Simplifies application and removal as the adhesive surface is minimised. Also prevents adhesive from coming into contact with double-coated surfaces. The tape is also available punched with different profiles according to requirements.

Art.No.	Width mm	Maximum temp. °C	Metres/roll
TMAM	100–500	220	66

**LINER TAPE**

Tape for cutting on a plotter.

Art.No.	Width mm	Maximum temp. °C	Metres/roll
TML	100–1000	220	66

**HAZARD WARNING TAPE**

Tape with high tensile strength for marking guardrails, steps, doors etc.

Art.No.	Width mm	Metres/roll
VT50	50	33

**AUTOMATIC TAPE DISPENSER M-1000**

After a piece of tape has been removed, a new piece appears automatically. The size can be seen clearly on the display and it is extremely easy to change. If a longer piece of tape is required, simply hold down the forward button until you have the desired length.

Art.No.	Dimensions mm	Weight kg	Label width range mm	Label length range mm
M-1000	137x218x150	3	7-50	5-999

**TAPE DISPENSER ZCUT-2**

Permits up to 20 pieces of tape with a single press of a button.
Ideal for several users at the same time. Safety button on the lid.

Art.No.	Dimensions mm	Weight kg	Label width range mm	Label length range mm
ZCUT-2	300x165x170	3,5	7-50	13-60

**TAPE DISPENSER AL 1150D**

Ideal for small labels and small spaces. Fitted with a photosensor that is both accurate and reliable. Automatically detaches paper, vinyl, polyester, foil etc. from its liner. Winds in the liner automatically for a tidier working environment. No tools are required to change to a different width or length. No maintenance required. The motor can also handle larger rolls. The core and reel size need to be a minimum of 50 mm ID and a maximum of 250 mm OD.

Art.No.	Dimensions mm	Weight kg	Label width range mm	Label length range mm
AL 1150D	210x210x220	5	6–140	4–200

**IGK-8000 AUTOMATIC TAPE DISPENSER**

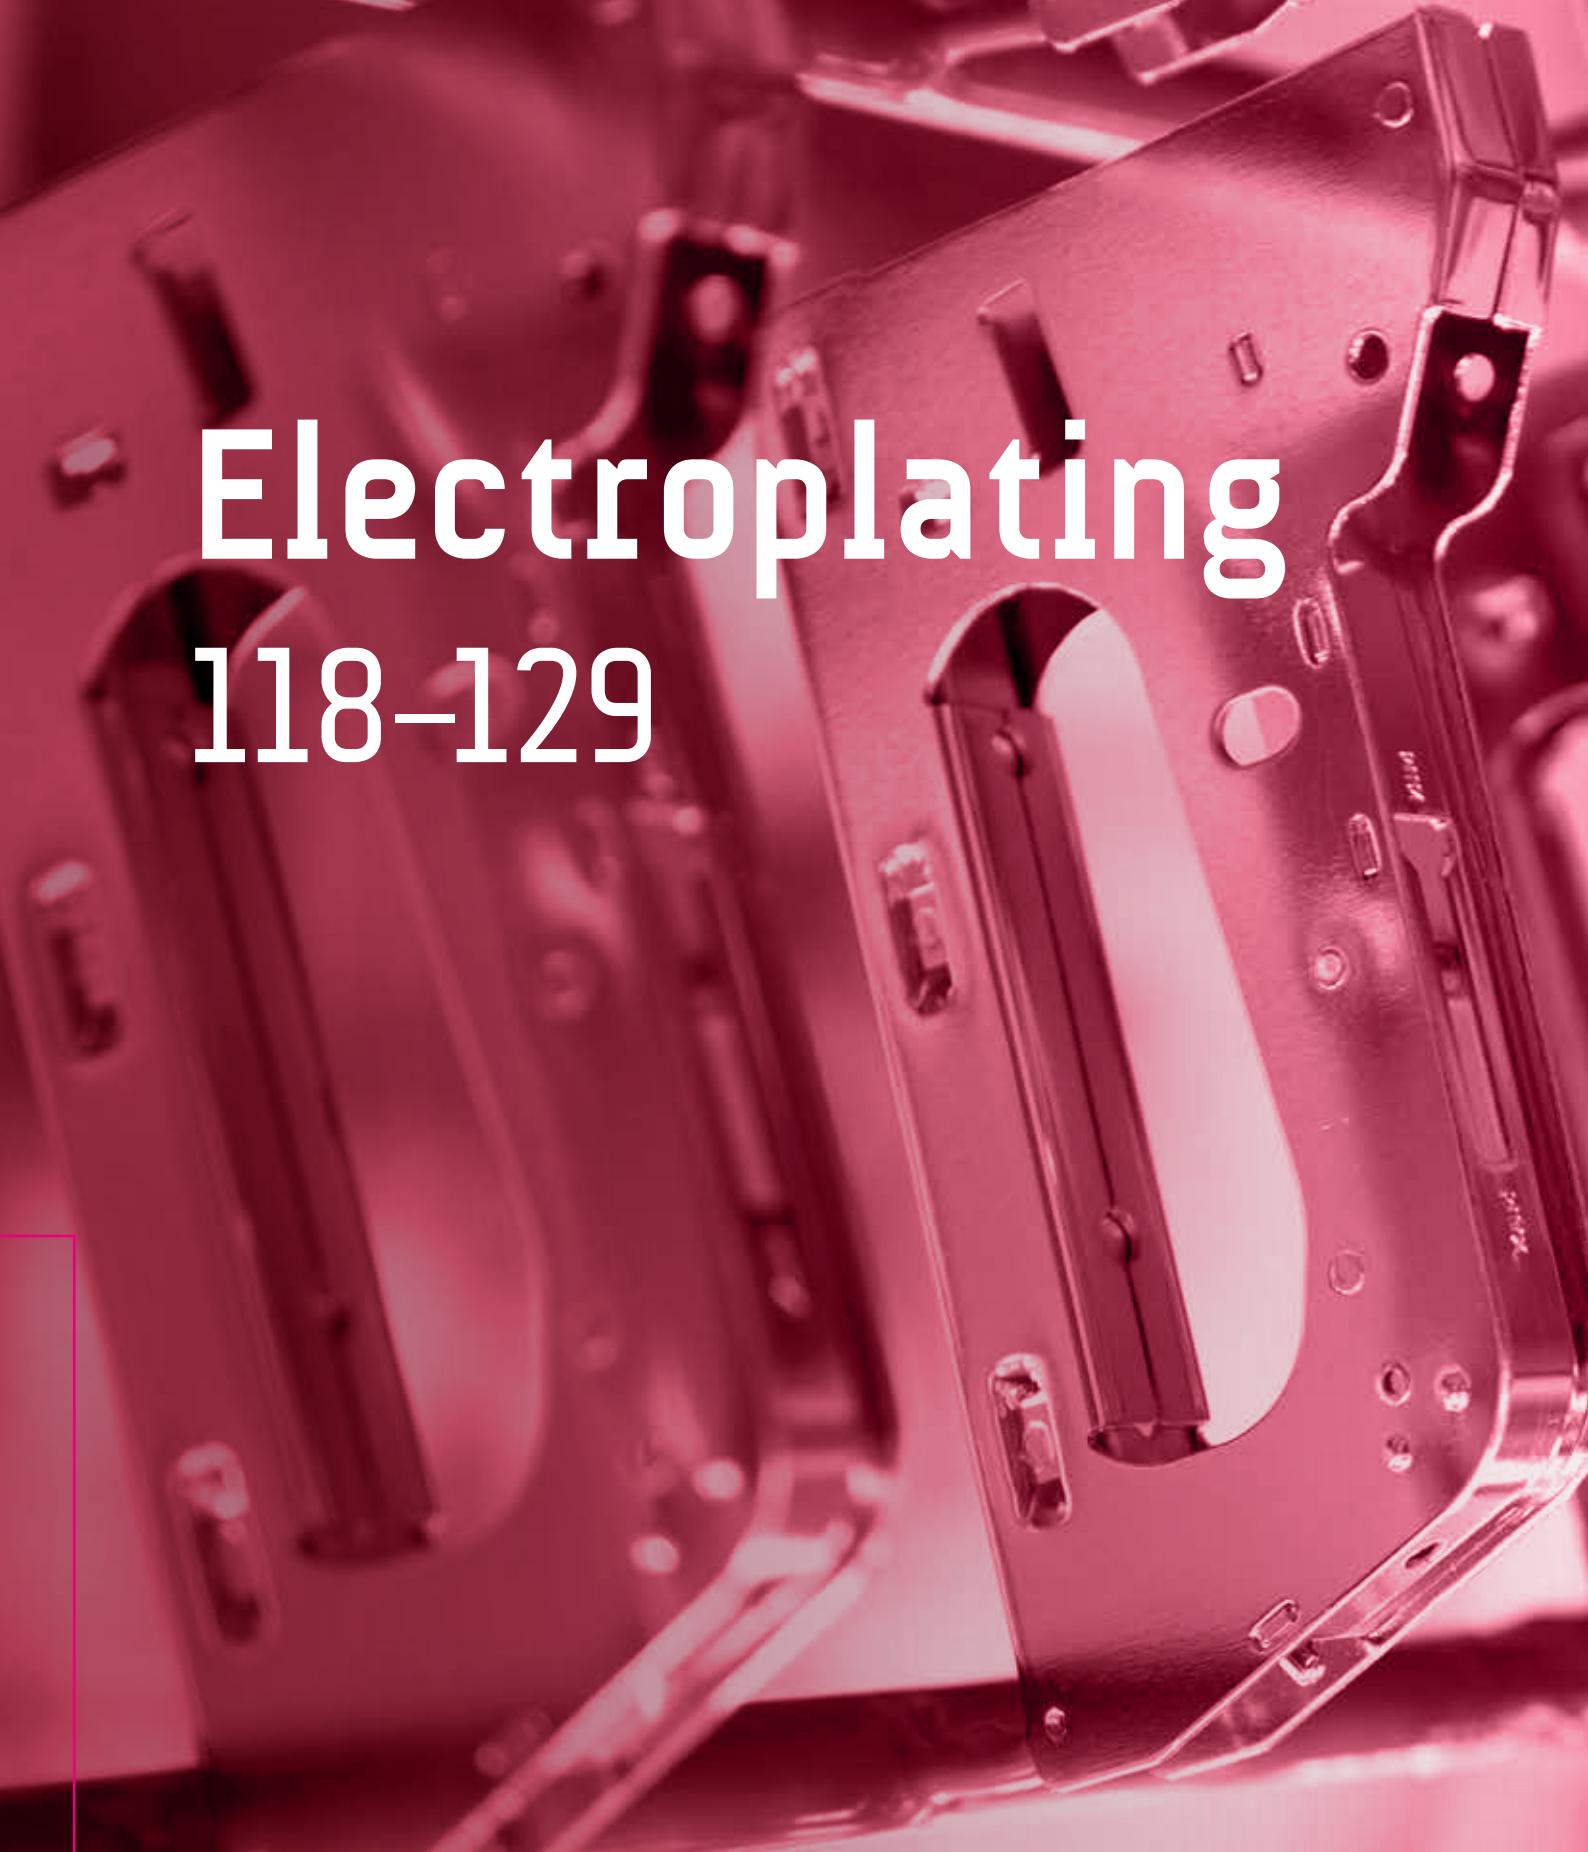

After tape strip is removed, next strip is automatically prepared. Length of desired strip visible on display. Speed 200 mm/sec.

Art.No.	Dimensions mm	Weight kg	Label width range mm	Label length range mm
IGK-8000	190x150x230	x4	10–80	5–999

**ZCUT-15 AUTOMATIC TAPE DISPENSER**

After tape strip is removed, next strip is automatically prepared. Length of desired strip visible on display. Speed 200 mm/sec.

Art.No.	Dimensions mm	Weight kg	Label width range mm	Label length range mm
ZCUT-15	190x150x230	6	10–150	5–999

PERSONAL SERVICE FROM EPIFATECH

Epifatech we adapt each product to suit specific customer requirements. With a personal contact and ongoing cooperation, we create optimised solutions that cover the entire production process.

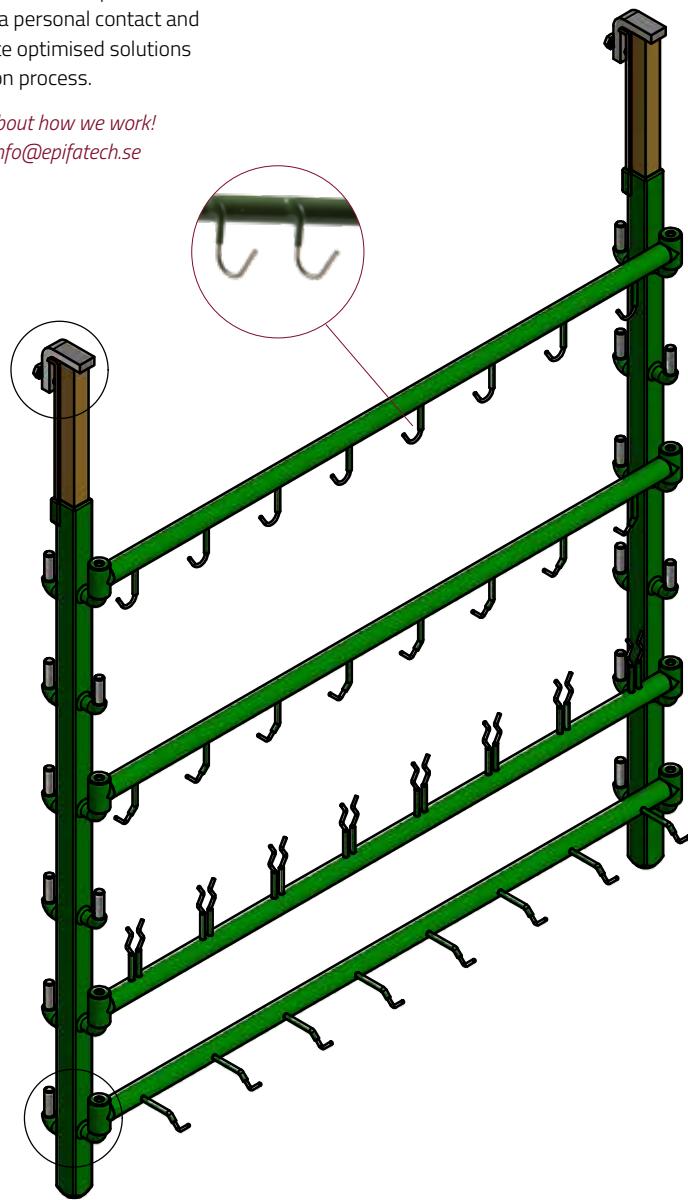

Call us and we'll tell you more about how we work!

Phone +46 371-51 16 85 | info@epifatech.se

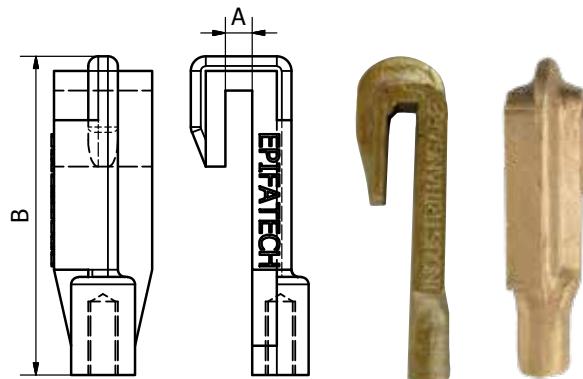

UNIVERSAL SUSPENSION SYSTEM

Our universal suspension system for electroplating. The flexibility of the system optimises space and ensures that both the width and depth of the vat can be utilised. The levels that are not used are shielded against coating.

In the universal system, hooks are made entirely according to customer wishes and are fixed into the system. This results in a highly stable suspension system that is optimised to fit into the customer's production system effectively.

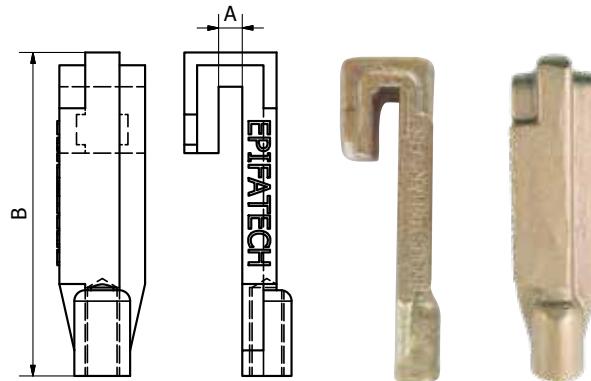

Fixture Head 1

Fixture head in cast brass with an internal thread (M6-M12) adapted to different types of fixtures.

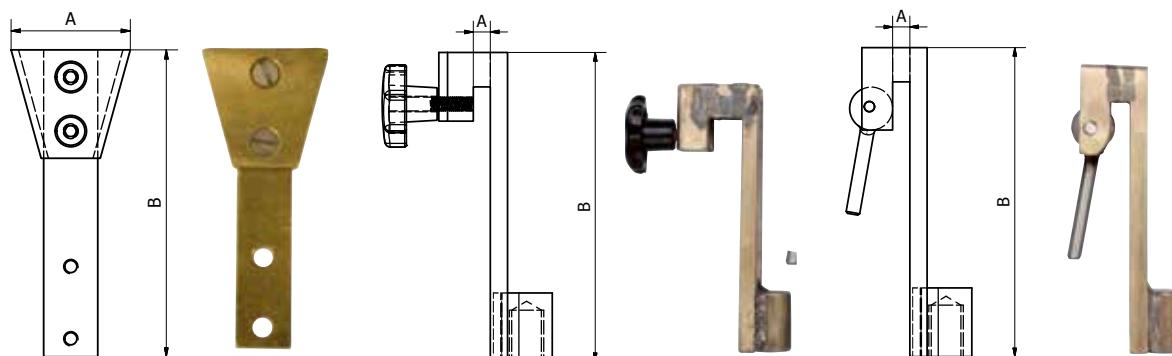

Art.No.	A mm	B mm
Huvud1	11	130

Fixture Head 2

Fixture head in cast brass with an internal thread (M6-M16) adapted to different types of fixtures. Also available with threads in the tongue for locking with a screw or screw knob.

Art.No.	A mm	B mm	C mm
Huvud2	11	150	11

Fixture Head 3

Fixture head in wrought brass, adapted to different fixtures for wedge attachment.

Art.No.	A mm	B mm
Huvud3	66	170

Fixture Head 4

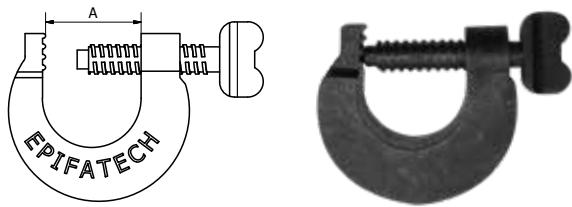

Fixture head in wrought brass that locks to the rail. The hook is intended for a higher level of electrical conductivity. Available with thread sizes up to M20.

Art.No.	A mm	B mm
Huvud4	10-20	180

Fixture Head 5

Fixture head in wrought brass with eccentric locking to the rail. The hook is intended for a higher level of electrical conductivity. Available with thread sizes up to M20.

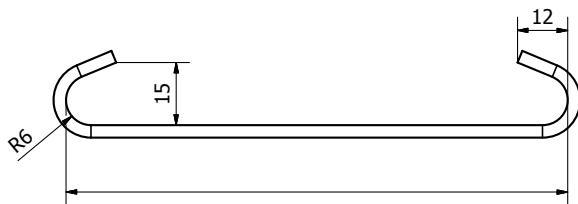

Art.No.	A mm	B mm
Huvud5	10-20	180

PLASTIC CLAMP

Epifatech's own plastic clamp is used in electroplating, supplied with or without a titanium tip. Available with different opening widths.

Art.No.	Pcs/box
PC40	20
PC60	20
PC75	20
PC100	20

COPPER HOOK

The hardness of the copper material has been produced specifically to suit electroplating.

Art.No.	Dimension	Pcs/box
Cu40x2.0	Copper hook 40x2.0	5000
Cu40x3.0	Copper hook 40x3.0	2500
Cu50x2.0	Copper hook 50x2.0	5000
Cu50x3.0	Copper hook 50x3.0	2500
Cu60x2.0	Copper hook 60x2.0	5000

Cu70x2.0	Copper hook 70x2.0	5000
Cu70x3.0	Copper hook 70x3.0	2500
Cu80x2.0	Copper hook 80x2.0	2500
Cu80x3.0	Copper hook 80x3.0	1250
Cu90x2.0	Copper hook 90x2.0	2500
Cu90x3.0	Copper hook 90x3.0	1250
Cu100x2.0	Copper hook 100x2.0	2500
Cu100x3.0	Copper hook 100x3.0	2000
Cu120x2.0	Copper hook 120x2.0	2500
Cu120x3.0	Copper hook 120x3.0	1250
Cu150x2.0	Copper hook 150x2.0	2500
Cu150x3.0	Copper hook 150x3.0	1250

COPPER WIRE

Copper wire for suspension and tying of products. Available from stock. The copper wire is wound onto small reels to simplify handling.

Art.No.	Dimension	Weight capacity
Cu0,5	0,5	5kg/reel
Cu0,7	0,7	5kg/reel
Cu0,1	1,0	5kg/reel

DESIGNED by EPIFATECH

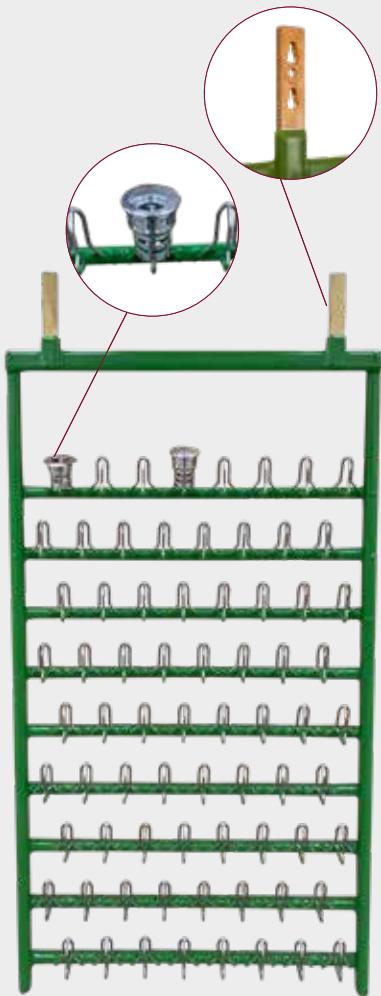

COMPLETE LEAD ANODE

Epifatech manufactures complete lead anodes for chrome plating vats. The suspension hook is made from ø16 Cu and is adapted for lifting. Screwed and soldered to the anode. The PVC coating is placed 50 mm down the lead anode. The anode is available in specified lengths.

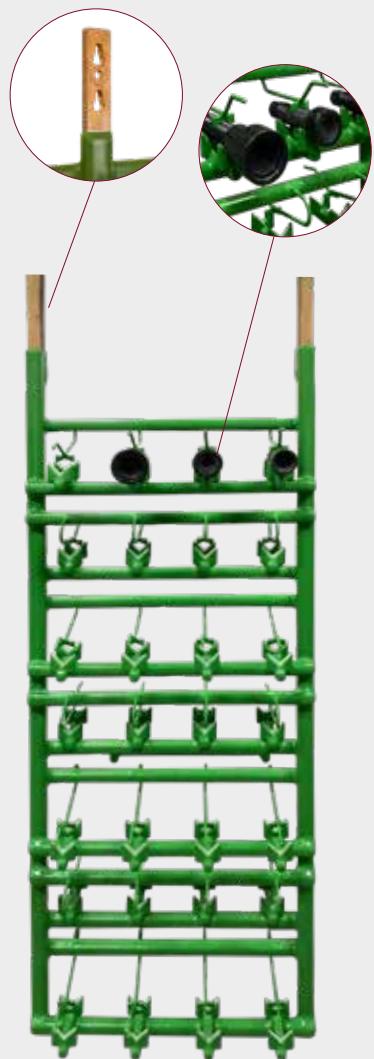

ZINC SPIRAL
Spiral for zinc balls.
Thread diameter 6-8 mm.

OPTIMISED by EPIFATECH

FRAME BRACKET

Product-adapted frame bracket for robotised picking and placing. The chosen materials are brass combined with titanium.

FRAME BRACKET

Frame bracket adapted to product for minimal suspension area and stable suspension.

ROUND ANODISING BASKET

Titanium basket for zinc balls.
Dimensions adapted to requirements.

A: Hook

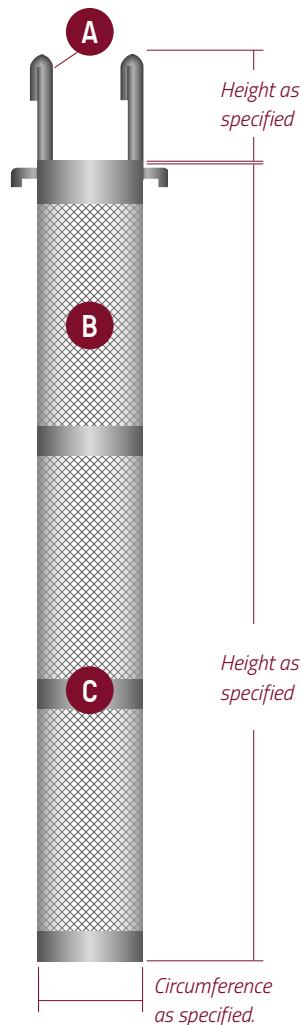

Hook diameter, square, 12 mm.
Length adapted to requirements.

B: Metal mesh

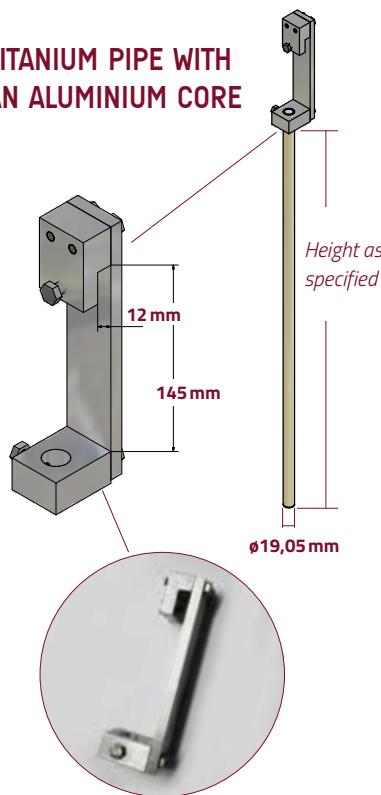

Stretch metal, 1.0 mm.

C: Reinforcement

Reinforcement bar, 1.0 x 12 mm.

TITANIUM PIPE WITH AN ALUMINIUM CORE

RECTANGULAR ANODISING BASKET

Titanium anode basket. Dimensions adapted to requirements.

A: Hook

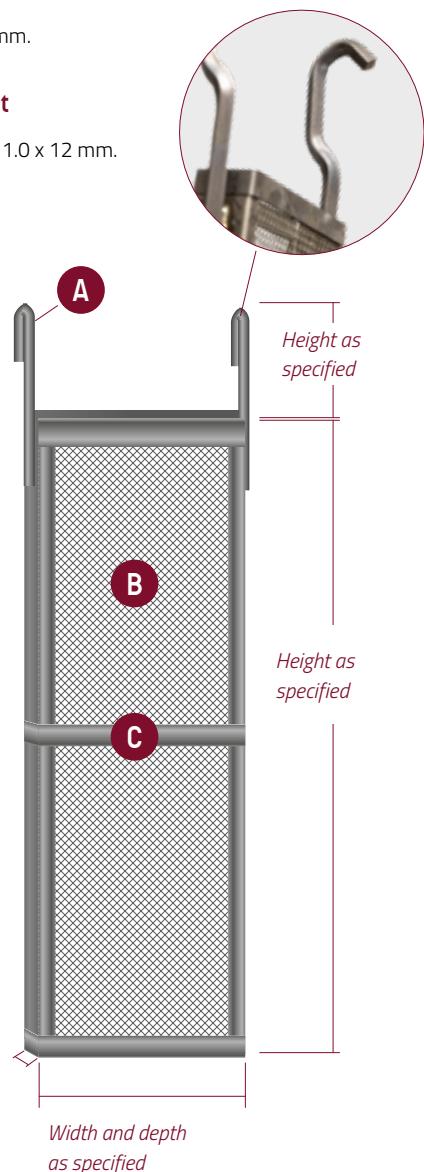

Hook diameter, square, 12 mm.
Length adapted to requirements.

B: Metal mesh

Stretch metal, 1.0 mm.

C: Reinforcement

Reinforcement bar, 1.0 x 12 mm.

FIXED TITANIUM RING

With a fixed titanium ring you can fasten the parts firmly to ensure stable suspension.

Art.No.	No. jack	Thickness mm
FTR20	20	3,0
FTR30	30	3,0
FTR60	60	3,0

AXLE RING SINGLE SUPPORT

The axle ring is used for easy fastening of screws and axles.

Art.No.	Span	Diameter mm
AXLR1	20	2,0
AXLR2	30	2,0

AXLE RING DOUBLE SUPPORT

The axle ring is used for easy fastening of screws and axles.

Art.No.	Span	Diameter mm
AXLR3	20	2,0
AXLR4	30	2,0

METAL FINGER RING

The metal finger ring is used to fasten the parts and can be combined with the fixed titanium ring or the double metal finger ring.

Art.No.	Span	Wire thickness mm
PFR1	20	1,2
PFR2	30	1,2
PFR3	20	1,6
PFR4	30	1,6
PFR5	40	1,2
PFR6	40	1,6
PFR7	58	1,0
PFR8	58	1,2

DOUBLE METAL FINGER RING

The double metal finger ring is used to fasten the parts firmly and can be combined with the fixed titanium ring or the metal finger ring.

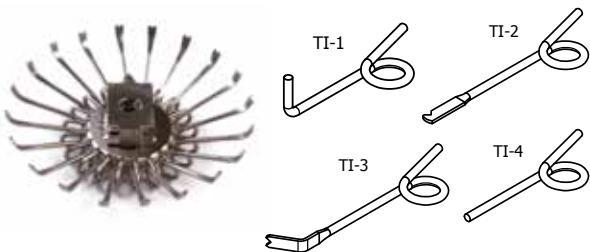

Art.No.	Span	Wire thickness mm
DPFR1	20+20	1,2
DPFR2	30+30	1,2
DPFR3	20+20	1,6
DPFR4	30+30	1,6

INTERNAL TENSION RING

Clamping ring used to fasten the parts easily between the springs.

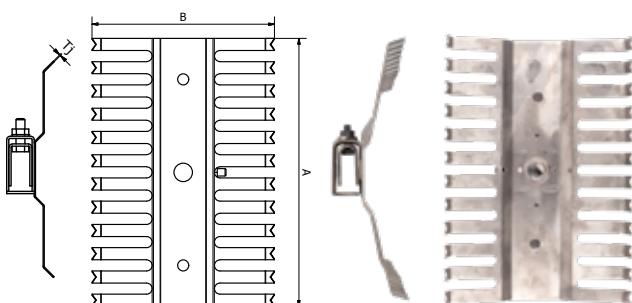

Art.No.	Span	Wire thickness mm	Angle	Arrowhead diameter
ISR1	20	1,6	45°	1,2
ISR2	20	1,6	Rakt fram	1,2
ISR3	30	1,6	45°	1,2

CASE: PROVEXA

Oscar Hultmark, Head of Department
Galvano, Provexa

“FUNCTION, PROTECTION AND SUSTAINABILITY SINCE 1881”

With patented ideas and ground-breaking surface technology that is changing our perception of what is possible with surface finishing, Provexa offers surface technology and surface finishing that is not just visually pleasing, but that also provides the right function and protection. With a focus on solutions, clear communication and good item descriptions and understanding, Epifatech can contribute as a supplier to Provexa to both better quality (for shorter lead times) and better prices for Provexa's customers.

Talk soon!

At Epifatech AB, excellent availability and close collaboration with our customers is something we prioritise highly in our day-to-day operations. For us, this means working with the customer to produce a tailor-made solution. By establishing a mutual collaboration at an early stage in the process, we make it easier to understand each individual customer's needs, which creates the foundations for finding the best possible solution. Don't hesitate to get in touch if you have questions about any of our products or our work.

Terms and conditions of sale

Terms and conditions of payment are 30 days net from the invoice date. We use electronic invoicing. Welded fixtures that are manufactured are saved for three years after the final delivery unless agreed otherwise. Delivery: Ex works.

EPIFATECH®

makes surface to content

When choosing suspension and masking technology, we are your obvious partner. Extensive experience and commitment built up over decades have made us a unique team member when it comes to surface finishing optimisation. We have evolved into a global company with representatives in several countries and with our own European sales and distribution system.
